

## Contract positions available with Cascadia Seaweed

**Position:** General Labourer and Crew Member (1 - 2 positions available)

### **Description:**

The team at Cascadia Seaweed is looking for individuals who are available for periodic, short-term contracts to support our west coast seaweed farming activities which include farm and nursery maintenance, processing and logistics, both on and off the water.

### **Requirements:**

The right person will be safety minded, physically fit, eager to learn and a good communicator. Having a driver's license is an asset. Having experience working in aquaculture, construction or seafood processing is an asset, but not required, as is first aid training.

### **About Cascadia Seaweed:**

In partnership with coastal First Nations, Cascadia Seaweed is growing to be the largest producer of ocean-cultivated seaweed in North America. Our BC-based company was founded in 2019 by three local maritime professionals who believe in building a profitable and scalable business that enhances the natural environment, reverses human impact on the oceans, and provides economic opportunity for coastal communities. Seaweed is a climate-positive crop with many end uses that does not require arable land or freshwater to grow. Cascadia is focused on restoring marine ecosystems, delivering products that reduce greenhouse gas emissions, and building a more resilient food system.
