Short-term Contract Opportunity with Cascadia Seaweed

Position: Planting Seeds on an Ocean Seaweed Farm Construction (2 or 3 positions available)
Tentative Dates: January 16 through 20, 2023

Description:
This is a short-term contract position to be part of the crew seeding our ocean seaweed farm at Diplock Island in Barkley Sound. Activities include working on small boats and handling floats, ropes and gear. You'll work on the water from the first light in the morning to the last light in the evening. A boat will transport the crew daily from Bamfield to the project site near Diplock Island. Accommodations and meals will be provided.

Requirements:
For this short-term contract position, the successful candidate will be safety minded, have experience working on the water, be comfortable working long days around heavy equipment, be physically able to labour in all weather conditions, and have their own gear including winter rain gear, warm layers, Personal Floatation Device (PFD), and steel-toe gumboots.

About Cascadia Seaweed:
In partnership with coastal First Nations, Cascadia Seaweed is growing to be the largest producer of ocean-cultivated seaweed in North America. Our BC-based company was founded in 2019 by three local maritime professionals who believe in building a profitable and scalable business that enhances the natural environment, reverses human impact on the oceans, and provides economic opportunity for coastal communities. Seaweed is a climate-positive crop with many end uses that does not require arable land or freshwater to grow. Cascadia is focused on restoring marine ecosystems, delivering products that reduce greenhouse gas emissions, and building a more resilient food system.
